Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-17, 21-22, 25-29, 31-40, 42-43, 47-48, and 50-62 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-61 of copending Application No. 09/867,549. Although the conflicting claims are not identical, they are not patentably distinct from each other because: Please see the description of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2814

Claims 1-4, 9, 13, 16-20, 22-24, 32, 35, 41-44, 46-48, 51, 57-58, and 61 are rejected under 35 U.S.C. 102(b) as being anticipated by Janssen et al. (US 5,570,444).

With regard to claims 1, 35, and 58 Janssen et al. disclose an optical assembly (col. 2, line 66 to col. 4, line 62 and fig. 3) comprising:

- A laser diode 3;
- An optical system including an optical fiber 4 and a lens 5, the optical system being configured to receive and transmit a beam emitted from the laser diode 1 through the lens to the optical fiber along an optical axis (fig. 3);
- A fastening means 11 for supporting at least a portion of the optical system (fig. 3);
- A base 9 configured to support the laser diode and at least a portion of the optical system, the base 9 including a structure support member 8 configured to prevent warping of the base 9, the structural support members 8 being elongated along the base 9 in a direction generally parallel to the optical axis (fig. 3);
- A bottom plate 2 configured to support the laser diode 3, the optical system, and the base 9.

With regard to claim 2-34, 36-57, and 59-62, please see the description of record.

Response to Arguments

Applicant's arguments filed 11/26/02 have been fully considered but they are not persuasive.

Art Unit: 2814

- Applicant argues that Janssen et al. do not disclose “prevent warping of the base”. However, this is a process limitation, which does not carry any patentable weight.
- Applicant argues that Janssen et al. do not disclose the structure support member 8 being elongated along the base 9. The examiner interpret the base is a massive block of material and Janssen’s block 9 fits the description. The structural support member 8 supports the optical system. The block 9 starts from one end of the optical system being elongated toward the other end. Therefore, Janssen et al. meet this limitation.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
